Further information

Overview of the technical infrastructure

In cooperation with its partner institutions ZB MED – Information Centre for Life Sciences and ZBW – Leibniz Information Centre for Economics, the Technische Informationsbibliothek (TIB) – German National Library of Science and Technology operates a digital archive.

The Rosetta digital preservation software by the manufacturer Ex Libris is used for this purpose. TIB hosts and administers the DP system in a dedicated data centre, and provides its partners with access to the system.

The digital preservation system is operated in three instances: development system, test system and production system.

General presentation of the technical infrastructure
