Further information

Submission information packages (SIPs)

TIB uses several levels of transfer packages, which are described on the page Submission information packages (SIPs).

Archival information packages (AIPs)

The structure and composition of archival information packages (AIPs) are described on the page Archival information packages (AIPs).

Dissemination information packages (DIPs)

The structure and composition of dissemination information packages (DIPs) are described on the page Dissemination information packages (DIPs).

Metadata

The Metadata page documents which descriptive, identifying, structural, technical, administrative and event metadata are recorded, and which metadata standards are used in the process.
